La capa interior blanca de un caucho vulcanizado termoplástico especial (TPV) tiene excelentes propiedades higiénicas y es resistente a la grasa y los ácidos. Grasa láctea no puede pasar a través de esta capa, así que la manguera permanece limpia.

El caucho negro exterior proporciona flexibilidad y alta durabilidad y resiste agrietamiento de ozono comúnmente visto en tubos lácteos.

Triangular liners have the advantage that they will fit a much wider range than conventional liners - this is to do with the way they grip the teat. Even so - the Impulse Air range comes in two generic size types. The IP10 range is designed for a wider teat range which is a feature of many European herds. The IP20 range is a narrow bore liner specifically designed for smaller and shorter teats and for easy milking cows with a high milk flow rate. Performance is significantly improved when we can make the liner more closely match the average teat size.

MILKRITE I INTERPULS PART NO.	MILKRITE I INTERPULS REF.	A (mm)	B (mm)	C (mm)	D (mm)
-------------------------------------	---------------------------------	-----------	-----------	-----------	-----------

MILKRITE I INTERPULS REF.	DESCRIPTION
---------------------------------	-------------

IP10 - Liner Range

205334-01	IP10-AIR	312.5	22.5	9.0	57.9	IP10 / IP20 / IP05	Fits claws with 12-13mm OD nipples with square cut	
205471-01	IP10-01-AIR	287.0	22.5	9.0	57.9			
205335-01	IP11-AIR	287.0	20.0	13.0	57.9	IP10-01	Fits claws with 12-13mm OD nipples with square cut. This is a shorter version to fit lower bagged cows	
205348-01	IP12-AIR	302.0	22.5	8.0	57.9			
205349-01	IP13-AIR	303.5	22.5	12.5	57.9	IP11	Fits claws with 14-16mm OD nipples with square cut. This is a smaller orifice version at shorter length for smaller teated and lower bagged cows	
205350-01	IP14-AIR	152.0	22.5	N/A	57.9			
205351-01	IP15-AIR	320.0	22.5	10.0	57.9			

IP20 - Narrow Bore Liner Range

205472-01	IP20-AIR	278.5	21.1	10.0	57.9	IP12	Fits claws with 10-11mm OD nipples with angled cut	
205473-01	IP23-AIR	278.5	21.1	15.0	57.9			
205474-01	IP24-AIR	137.5	21.1	N/A	57.9	IP13 / IP23	Fits Harmony type claws	
205475-01	IP25-AIR	278.5	21.1	10.1	57.9			
The IP20 range is only available with mouthpiece vent						IP14 / IP24	Short liner - comes with a sight glass. Can fit any claw - just choose the right short milk tube	
						ALL TYPES		

The IP20 range is only available with mouthpiece vent

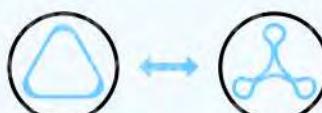

IP05 - Large Bore Liner Range

205731-01	IP05	320.0	25.0	10.0	64.0	IP15 / IP25	Fits claws with 12-13mm OD nipples with angled cut

The Technology

Our TLC liner range has all the benefits of our triangular technology (less slipping, improved comfort, less teat damage etc) but has the added benefit of being able to fit into any existing parlours round shells.

IP10 Liner Range - Non Vented

200008-01	IP10	312.5	22.5	9.0	57.9
200022-01	IP10-01	287.0	22.5	9.0	57.9

BOMBAS DE VACÍO LÓBULOS / BLOWER

BLOWER SERIES (BLW) P.V. 3300 / P.V. 5000 / P.V. 7500

CTA ha desarrollado para el mercado del ordeño un modelo de bomba seca de 3 lóbulos.

Extremamos la tendencia del mercado que ya ha desarrollado la oferta con un desprendimiento progresivo del rotor compresor clásico con 2 lóbulos en favor de las máquinas con 1 rotor con 3 lóbulos.

Ventajas tecnológicas del uso de compresores y sopladores con 3 rotores de lóbulos:

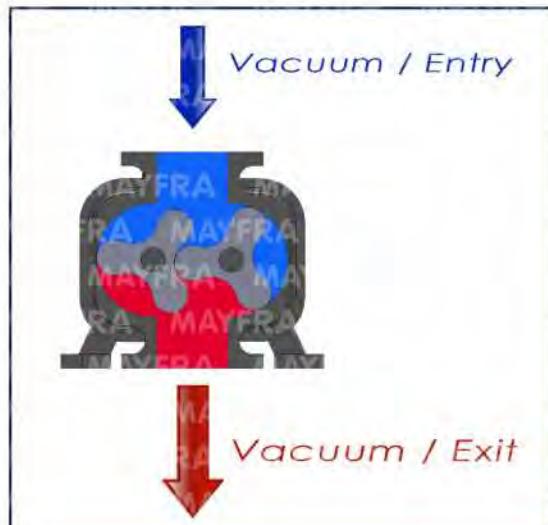

- 1.- Rigididad mejorada: el haz del rotor es 85 veces más rígido.
- 2.- Mejor equilibrio: distribución de masas más homogénea.
- 3.- Aumento de prevalencia: Cuerpo de rotor dinámico a prueba de fugas de 2 puntos.
- 4.- Pulsaciones menores: 6 vueltas en lugar de 4 para el eje giratorio.
- 5.- Menor perdida de rendimiento: Menos sensible a la compresión.

Polución cero.

El principio de bombeo es completamente libre de aceite y sin elementos de sellado sujetos a desgaste.

La emisión atmosférica está por lo tanto libre de aceite o polvo fino, defectos que hay en una bomba de paleta seca, por lo que se respeta el medio ambiente.

Mantenimiento normal y mínimo: reemplazo periódico del filtro del aire de refrigeración y cojinetes lubricados, **bajos costos operativos.**

VARIADOR DE FRECUENCIA-LLAVES Y MANGUITOS DE VACIO

VARIATEUR DE FREQUENCE-CLÉS ET MANCHONS À VIDE/VACUUM SET & RUBBER

ref. **3429** 50 Ø = 1½"

ref. **3430** 63 Ø = 2"

ref. **3431** 75 Ø = 2½"

ref. **3432** 90 Ø = 3"

ref. **3433** 110 Ø = 4"

LLAVE COMPUERTA PVC

ROBINET PVC

VALVE FOR VACUUM LINE

El VARIADOR DE FRECUENCIA SVS

regula con precisión la velocidad de las bombas de vacío, para asegurar tanto un consumo de electricidad mínimo como la máxima estabilidad de vacío.

Ventajas:

- Ahorro de energía eléctrica.
- Estabilidad de vacío.
- Reducción de ruido.
- Mayor durabilidad de la bomba.
- Fácil instalación.
- Sencillo manejo.
- Mantenimiento reducido.

MANGUITOS DE VACIO / MANCHONS À VIDE / RUBBER

3513 - 75x75 Ø

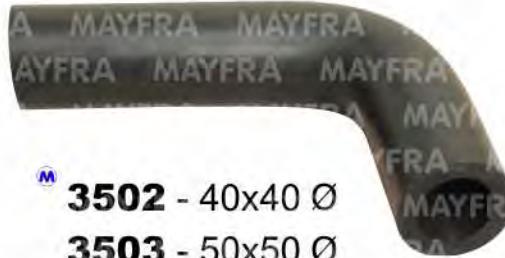

3514 - 90x90 Ø

3515 - 110X110 Ø

3509 - 40x40 Ø

3510 - 50x50 Ø

3511 - 63x63 Ø

3502 - 40x40 Ø

3503 - 50x50 Ø

3501 - 30x30 Ø

3500 19x19 Ø

Dati Tecnici

Tipo: Alternato o Simultaneo
Tensione di alimentazione: 12*/24VDC
Assorbimento: 260 mA (130 mA per bobina 24V);
540 mA (270 mA per bobina 12V)
Collegamento al vuoto: 1/2" Gas femmina
Sistema di azionamento: Servo-Diretto
Materiale del corpo: Resina termoplastica
Dimensioni: 85x90x105 mm
Peso: 0,40 Kg

*12V Articolo speciale disponibile su richiesta

Technical Data

Type: Alternate or Simultaneous
Operating Voltage: 12*/24VDC
Power Consumption: 260 mA (130 mA per bobina 24V);
540 mA (270 mA per bobina 12V)
Vacuum Connection: 1/2" Bsp female
Operating System: Servo-Direct
Body Material: Thermoplastic resin
